

Welcome to Wellspring Kids! We are so glad your family is choosing to join us. Here are a few helpful details about our program.

Allergies and Special Needs

Please notify us of ANY and ALL allergies, medical or behavioral special needs so we can best help your children. For health and safety reasons, snacks and food are not permitted in our kids environment. (Labeled bottles for babies and crawlers are allowed.)

Wellness

We place children's health and safety as a top priority in our kids environment and we have the best interest of each child in mind. Children who have shown signs of fever, vomiting, diarrhea, or other contagious illnesses should be symptom and fever-free for 24 hours before coming to Wellspring Kids.

Safety and Security

In order to provide the safest environment for children while in our care, we follow a strict check-in process. Please save your security tag and show it at the time of pick-up.

Our Volunteers

All Wellspring Kids volunteers are committed to providing the best for your child. They are carefully background-checked and trained to work in our kids environments.

Relationships

We believe a consistent environment is best for children, so we encourage your children to attend the same hour each week. They will make friends and have the same small group leaders.
